Regional Transportation Plan

Amendment #2
MPO Adoption 1/29/08

INTRODUCTION

The Council of Fresno County Governments (Fresno COG) is the Regional Transportation Planning Agency (RTPA) for the Fresno County region, a designation given by the State of California. Under federal legislation, it is also designated as the Metropolitan Planning Organization (MPO). Working with technical advisory committees, interested citizens, and other government agencies, a coordinated effort has been made to develop a multimodal regional transportation system plan for Fresno County.

The 2007 Regional Transportation Plan (RTP), adopted in May 2007, is a comprehensive assessment of all forms of transportation available in Fresno County and of needs for travel and goods movement projected into the future until the year 2030. Development of the RTP is a process of intergovernmental cooperation, coordination and long-range planning which has involved the fifteen cities, Fresno County, staff from related local public agencies, the Air District, Caltrans, and the public. This process has been accomplished within the framework of the Fresno COG, which is the Regional Transportation Planning Agency (RTPA) for the Fresno County area. Updated editions are required every four years and are refinements of the original and subsequent plans. It is required under state and federal planning regulations; projects cannot be programmed for state or federal funding, nor implemented, unless identified in the RTP.

Federal and State legislation mandate that long range transportation planning be done every four years for a period of at least 20 years into the future. The 2007 version of the Regional Transportation Plan is a reflection of the federal directives embodied in Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) and the Clean Air Act Amendments of 1991. These acts require that Regional Transportation Plans include only those projects which can actually be delivered with funds expected to be available, and that those projects will help attain and maintain air quality standards.

This plan specifies those projects and programs that can be funded throughout the life of the plan, and evaluates them through a process of computer modeling, to determine their impacts upon air quality. This is called demonstrating “conformity” with adopted air quality targets. Projects will only be evaluated for conformity if they have a strong likelihood of being funded. The financial element of the plan will advocate for a stable and equitable approach to statewide funding, so that the entire Valley can respond appropriately to the needs of a growing population, environmental quality, and the continuing needs of both maintenance and innovation in transportation systems.

2007 RTP AMENDMENT #2

Financial Element

Fresno COG adopted the 2007 RTP to comply with the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) planning regulations. SAFETEA-LU planning regulations require that the RTP’s revenues and costs be shown in year of expenditure dollars. In addition, all projects to be included in the Federal Transportation Improvement Program (FTIP) must be fully funded in the RTP, and include estimated total project cost.

The proposed amendment incorporates changes in the financially constrained and unconstrained project lists to reflect constantly changing priorities of local jurisdictions and regional agencies. The Financial Element of the 2007 RTP was developed with rate of inflation and rate of growth estimates consistent with the requirements of SAFETEA-LU. Additionally, this amendment does not interfere with the timely implementation of any SIP approved TCMs.

Projects included in the Financially Constrained List have undergone air quality conformity analyses to ensure that they contribute to the region's compliance with state and federal air quality regulations.

Attached are several projects added to the Unconstrained Project List, which incorporates the region's unbudgeted "vision". These projects represent alternatives that could be moved to the constrained program if proper funding can be identified. Status as an unconstrained project does not imply that the project is not needed; rather, it simply cannot be accomplished given the fiscal constraints facing the Fresno region. Unconstrained projects are not included in the air quality conformity analysis.

The financial analysis indicates that the 2007 RTP remains fiscally constrained with amendments of these projects. The air quality conformity analysis indicates emissions for ozone precursors, particulate matter, and carbon monoxide remain below established mobile source emissions budgets.

Chapter 5

Financial Element

5.1 Introduction

The Financial Element of Fresno COG's 2007 Regional Transportation Plan (RTP) is intended to provide the costs and revenue assumptions necessary for decision makers to implement the RTP. These assumptions include revenue estimates for specific governmental funding programs, local contributions and tax initiatives. The intent of the financial assumptions is to provide a level of financial detail adequate for options to be exercised by State and local decision makers.

5.6 Financially Constrained Project Lists

The financially constrained projects within Fresno COG's current Federal Transportation Improvement Program are programmed between the years 20008/09 thru 2011/12. Costs are current total project costs, including a Rate of Growth of 3.5%, as required to be submitted to Fresno COG at the time of application. Projects identified include those from the current and future Measure C programs, Regional Choice program, RSTP, CMAQ, TE, SHOPP and various assorted federal and state programs. All candidate projects are consistent with those identified in the Caltrans Interregional Improvement Program (IIP) and the Regional Transportation Improvement Program (RTIP). In addition, all candidate projects are considered with the regional goals, policies, and objectives identified in Chapter 3.

Exhibit 5-5 has been revised and includes the complete listing of all projects contained in the 2009 FTIP through Amendment 3.

Exhibit 5-6 has been revised and includes the complete listing of the candidate list of regional transportation projects that have been modeled for air quality conformity and are financially constrained based on anticipated available revenues over the life of the RTP.

Exhibit 5-6(a) lists projects that have been added to the "vision", or financially unconstrained project list for Fresno County.

Exhibit 5-10 is the multi-modal list of projects that have been identified for funding through the reauthorization of Measure "C". All projects on this \$1.7 billion list are to be funded by future Measure "C" revenue. In total, all of the identified projects add up to approximately \$4.9 billion, including 3.5% Rate of Growth. Additional information on the implementation of Measure C projects and programs is available in Appendix E of the 2007 RTP and the Measure C Expenditure Plan.

Exhibit 5-11 shows the financial constraint summary for the 2007 RTP, including Amendment #2.
