

VMT Modeling - June 2021 Update

Fresno COG can process VMT modeling requests on a first come, first-serve basis, with an average turnaround time of a few weeks. To address the number of requests, Fresno COG has selected 4 preferred consultants for VMT Modeling. These consultants may be used by interested parties to run VMT modeling scenarios using Fresno COG's ABM model. Our preferred consultants may provide a quicker turnaround time than Fresno COG staff can provide and are therefore available to use as an additional option. The following firms are listed in alphabetical order.

[DKS Associates](#)
